### Summary

A drop in replacement for 24mm Sanwa arcade buttons

[Gadgets](#) > [Video Games](#)

Tags: [arcade](#) [arcadebutton](#) [arcadejoystick](#) [fightstick](#) [hitbox](#)

This is a 24mm arcade button housing, nut, and cap using a cherry MX Switch.

The tolerances are a bit tight on the threads, 0.1mm layer height is a requirement, and the STL was mostly adjusted for my own 3D printer. You may have to play with your printer settings to get it to thread properly.

Wires will need to be soldered onto the Cherry MX switch itself.
